

Kids in Care Settings (KICS)

Kempe's Kids In Care Settings (KICS) Clinic, in partnership with Children's Hospital Colorado, opened its doors in May 2023 for children in out-of-home placement. Our care model is trauma-informed, culturally responsive, focuses on both biological families as well as foster and kinship families and is committed to health equity. We provide integrated mental and behavioral health, physical health and related coordination and navigation, all of which are critical in meeting the healthcare needs for children whom who are under the state's care.

STAFF PROVIDING
UNCONDITIONAL, POSITIVE,
TRAUMA INFORMED CARE

kempe.org

Starting in April 2023, the Children's Hospital Colorado will start offering services through the KICS Clinic on Monday afternoons. The Kids In Care Settings (KICS) Clinic is for children and teens who are in out-of-home placement. Our care model is trauma-informed, culturally responsive, and focuses on both biological families as well as foster and kinship families. We also work with community partners and are committed to health equity. Our services include:

- Integrated mental and behavioral health
- Physical health
- Care coordination
- Community health navigation
- Social work
- Behavioral health navigation

Our Clinic

- Patients who qualify for KICS Clinic services include:
 - Babies who were exposed to drugs and alcohol before birth (Infants prenatally substance exposed (IPSE) and placed in out-of-home services before leaving the hospital through the CHoSEN Collaborative
 - Youth (0-18 years) newly-placed in foster and kinship out of home placement from Arapahoe County

What Makes KICS Different

- Comprehensive screenings in development, depression, anxiety, substance use, trauma, caregiver mental health, and resource needs
- Improved access to medical, mental and behavioral health, dental, and psychosocial services
- Enhanced care coordination and communication with community partners
- All staff are trained in Trauma Informed Care
- Longer appointment times
