

THE KICS CLINIC WISHLIST

The Kids In Care Settings (KICS) Clinic is a clinic at Children's Hospital Colorado that serves as a medical home for children who are in out of home placement (foster care or kinship care). The clinic has an interdisciplinary team including integrated mental and behavioral health, physical health, care coordination, community health navigation, social work, and behavioral health navigation to help connect families with needed resources.

So much of what is needed in working with this population is flexible resources. Each patient and family has their own unique set of needs and the more we can be equipped to meet people where they are at and offer resource, connection, and support that are directly related to self-identified needs and goals, the better positioned we are to take the best possible care of children, youth and their families.
