

The Kids in Care Settings Clinic

Making healthcare accessible for *all* children.

The KICS Clinic provides health services for children that are in out of home placements such as kinship or foster care.

Prior to the KICS Clinic, children in out of home placement would have frequent doctor changes and challenges accessing health and dental care. Acting as a comprehensive multi-disciplinary medical home, KICS prevents health problems from falling through the cracks.

A one-stop-shop to give consistent and wholistic care.

- Physical health
- Mental and Behavioral health
- Resource connection
- Specialist coordination (Dental, Developmental and Behavioral Pediatrics, Eye Clinic)

The KICS Clinic strives towards a more equitable future, so every child has the chance for a safe, healthy, and fulfilling life.
